

How healthy is your river?

Use your results from the river to try and decide how polluted your river or stream

POLLUTION LEVEL	How much life is there in your river?		
A	 Mayfly Nymph	 Stonefly Nymph	If you find these minibeasts then there is NO POLLUTION . Your river is very healthy.
B	 Caddis Larva	 Freshwater Shrimp	If you find these minibeasts, but none from Group A then there may be SLIGHT POLLUTION . Your river is healthy.
C	 Water Louse	 Bloodworm	If you find these minibeasts but none from A or B then there is probably MEDIUM POLLUTION . Your river is quite healthy but could be better.
D	 Sludge Worm	 Rat-tailed Maggot	If you find these minibeasts but none from A, B or C then there is A LOT OF POLLUTION . Your river is not healthy.
E	No Life		If you find no minibeasts at all then the water is very polluted. Your river is dying.
